MESSRING establishes subsidiary in India

MESSRING, the worldwide market leader for planning, development, creation and services of turnkey crash-test facilities, has now established its own subsidiary for better client support with a very comprehensive service offer in India.

On 3.7.2008, the President of Concord International, K. T. Ravindranath, Bangalore, India, who has been the representative of MESSRING for many years and the President of MESSRING, Ulrich Führer, Krailling, Germany, have contractually agreed to establish the MESSRING Service India, in Bangalore. MESSRING Service India, is a 100% subsidiary of MESSRING Systembau MSG GmbH, Krailling near Munich in Germany.

President of the new subsidiary is Mr. K.T. Ravindranath, Chairman of the Board is Mr. Ulrich Führer and General Manager is Mr. Charan Kumar, Sales Engineer for MESSRING in India for many years.

MESSRING Service India, will take care of the following tasks for the clients in the Indian market:

- Complete Crash facility and crash simulation system service,
- Maintenance, Repair and Calibration of data acquisition systems and sensors,
- Dummy Service (incl. calibration),
- Training-Center for handling and control,
- Training center for data acquisition systems and evaluation software,
- Regular User-meetings with international training staff

Two Indian mechatronics engineers are now intensively trained by MESSRING in Krailling and will guarantee 24 h on-site service. In the process, they will be supported by a 18-member service team operating all over the world directly from Krailling and if required they would be supported on-site.
