**iDummy™ Now Compatible
with Messring and Kayser-Threde Systems**

(Seal Beach, CA, USA) **Diversified Technical Systems, Inc. (DTS)** and **First Technology Safety Systems, Inc. (FTSS)** announce that **Messring and Kayser-Threde users now have the ability to seamlessly integrate iDummy™ into their test systems with no change to existing hardware or software.**

Using a CrashLink®-compatible TDAS PLUS Mini Distributor, the user can connect up to 4 iDummies™ to Messring NA33 or Kayser-Threde MINIDAU® systems.

For Messring NA33 users, Crashsoft3® software now supports both the NA33 and TDAS G5 DAS – the heart of iDummy™.

For Kayser-Threde MINIDAU® users, there are many options.

- Messring Crashsoft3® supports both MINIDAU® and TDAS G5 iDummy™.
- WINCARAT® can be used with TDAS G5 compatibility mode developed by DTS. Using the compatibility mode, TDAS G5 accepts WINCARAT® commands and returns the proper responses. Each 32 channel TDAS G5 is setup in WINCARAT® as if it were a MINIDAU®, with no other changes required by the user and no additional software drivers.
- For CrashDesigner® software, Kayser-Threde has announced that they will support TDAS G5. Contact Kayser-Threde for more details.

Since its introduction in 2003, the iDummy™ with the integrated TDAS G5 DAS has been the most widely used in-dummy data collection solution. iDummy is available today for Hybrid III 5th and 50th, SID-IIIs, BioRID, WorldSID 5th and 50th, POLAR, and THOR. iDummy will soon be available for ES-2 and Q series.

For more information visit www.icrashtech.com or call DTS at +1-562-493-0158.
